This article applies to the Honda Accord (1990-2002). Four main processes (among others) must occur for a car to start: the ignition system must deliver an electric spark across the spark plug gap; the car's battery must deliver sufficient energy, which is measured in volts, to power the vehicle across distances; the car's electrical and mechanical systems, which are comprised of a number of ...

Alternator/generator/regulator problem is a common vehicle problem that happens to most car brands and models. The following is a sample list of Alternator/generator/regulator problems reported in most popular vehicles.

### **Alternator/generator/regulator Problems in popular cars**

Both B2 and B3 offer a 25-percent boost in initial power. But the braking curve for B3 is more aggressive than that of B2. This means that, even though you will start out with the same intensity when using these boost levels, you will get an overall more aggressive braking experience with the higher level.
