Transcription factor binding site prediction? - ResearchGate

While no single factor is responsible for the recent, dramatic increases in overweight and obesity, a scientific consensus has emerged suggesting that consumption of sugar-sweetened products, especially beverages, is casually linked to increases in risk of chronic, debilitating diseases including type 2 diabetes, cardiovascular disease, hypertension and stroke.

Artificial sweeteners are not the answer to childhood obesity

The negative impact of consuming sugar-sweetened beverages on weight and other health outcomes has been increasingly recognized; therefore, many people have turned to high-intensity sweeteners like aspartame, sucralose, and saccharin as a way to reduce the risk of these consequences.

Artificial sweeteners produce the counterintuitive effect ...

The environmental impact of transport is significant because transport is a major user of energy, and burns most of the world's petroleum. This creates air pollution, including nitrous oxides and particulates, and is a significant contributor to global warming through emission of carbon dioxide. Within the transport sector, road transport is the largest contributor to global warming.

The Republic of China recognises all UN member states, with the exception of the PRC, the territory of which it regards as its own, and North Korea, as it recognises the Republic of Korea as the representative of Korea. Of the two UN observer states, the ROC recognises the Holy See, with which it has relations, but not the State of Palestine. However, Taiwan does recognise the Republic of ...

Introduction to the bibliography Despite significant growth in the number of research papers available through open access, principally through author self-archiving in institutional archives, it is estimated that only c. 20% of the number of papers published annually are open access.

The effect of open access and downloads ('hits') on ...

Past Projects. Papers submitted in response to CAS call paper programs and the results of other research projects are typically posted in the CAS E-Forum. Completed projects funded by The Actuarial Foundation's Individual Grants Competition can be found cited on their Web site. Those are published in various refereed actuarial journals.

Past Calls for Papers and Requests for Proposals

Below is an expanded study researched and written in August 2013 which elaborates on peer-reviewed findings published by World Transport Policy and Practice in January 2015. The data is accurate and can be used by any researcher investigating the efficacy of bicycle helmet laws in the United States.

Compulsory bicycle helmets in the United States

This report focuses on the editing and statistical imputation procedures that were applied to respondent data for the 2017 NSDUH. Logical editing uses data from elsewhere within the same respondent's record to reduce the occurrence of missing or ambiguous data or to resolve inconsistencies between related variables.

Dietary Calcium. Adding calcium to meals could decrease the available soluble oxalate resulting in less oxalate absorbed. A 2003 study from Lincoln University in New Zealand measured the oxalate absorption from spinach with calcium added to the diet (). The spinach contained 957 mg of oxalate, of which 737 mg was soluble.
