The Saddle Rigging . The saddle rigging is a key element in a saddle's safety. It's the arrangement of rings and plates, the rigging hardware, for connecting the straps that hold the saddle in place on a horse's back. Sounds simple enough, but saddle rigging is one of the most misunderstood parts of a western saddle.

Crab's Claw Rig. The other sailboat rigging type is the [ crab's claw rig, ] similar to a lateen sail in basic shape except there is a spar on each of the two longer edges. The crab's claw sail is set pointed down with both spars angled upward. Research shows that it may have the potential to produce more power than other types of sails on all but a close-hauled course.
