Auriga is one of the 88 modern constellations; it was among the 48 constellations listed by the 2nd-century astronomer Ptolemy. Located north of the celestial equator, its name is the Latin word for "the charioteer", associating it with various mythological beings, including Erichthonius and Myrtilus. Auriga is most prominent during winter evenings in the northern Hemisphere, along with the ...

Auriga (constellation) - Wikipedia

Throughout time, people have looked up at the night stars with imagination and awe. In the past, our ancestors thought that the patterns in the stars were designs that reflected some of their heroes, gods and goddesses and even stories that they passed from one generation to another.
