How Do I Learn DSP? What follows is one person's response to the perennial question "How do I learn DSP?" It was written by Dale Grover, with input from folks including Rick Lyons, Randy Yates, and Grant Griffin, though their participation is not an endorsement of every opinion expressed here--they're just good guys. A disclaimer: I am a co-author of one of the books mentioned.

Set this parameter to FFTW to support an arbitrary length input signal. The block restricts generated code with FFTW implementation to host computers capable of running MATLAB ®. Set this parameter to Radix-2 for bit-reversed processing, fixed or floating-point data, or portable C-code generation using the Simulink ® Coder™.

Underwater acoustics is the study of the propagation of sound in water and the interaction of the mechanical waves that constitute sound with the water, its contents and its boundaries. The water may be in the ocean, a lake, a river or a tank. Typical frequencies associated with underwater acoustics are between 10 Hz and 1 MHz. The propagation of sound in the ocean at frequencies lower than 10 ...
