After using aNUT's very helpful thread to help me re-do my vacuum lines, I decided to re-make his diagrams into more complete, readable, printable, noob-friendly forms. I used his diagrams in combination with TonyJetta's labels. They're color coded so that you don't start looking at one and accidentally look at a different one next time you take a glance.

2 Stroke Engine Running Animation Diagrams. As the 2 stroke engine animation below shows, a two-stroke engine in its purest form is extremely simple in construction and operation, as it only has three primary moving parts (the piston, connecting rod, and crankshaft). However, the two-stroke cycle can be difficult for some to visualize at first because certain phases of the cycle occur ...

There doesn't seem to be a comprehensive source for vacuum hose diagrams. Bentley, Haynes and others are sketchy, the parts fiche gif images are grainy and have too much detail and mainly verbal descriptions exist in the Type 2 archives and at Bus Boys. I've compiled this information from personal measurements, ETKA and other sources.

There are a set of hoses that run across the top of the motor and connect to the air/oil separator that are not used with the Boxster. Disconnect the hoses attached to the air-oil separator (green arrows), disconnect the small water hose from the front (see next photo), and then lift up and remove the bundle from the engine (red arrow).

The engine air-oil separator is an emissions device located on the top right rear corner of the engine. The separator is responsible for collecting residual gases and vapors contained inside the crankcase and funneling them back into the intake manifold where they can be burned in the combustion chamber.
