Here, the first part is called parameter list and is specified using <param> tags. When it is present, include body that follows it should be enclosed within <definition> tag. At the moment, parameter list is optional and is mainly used for specifying default values for parameters (such as 120 and 225 above), but is otherwise not mandatory.. The above include can be called like this:

Pros: These radios are packed with new features for scanning, searching, and especially for digital trunking. The 'Multi-Site' feature allows you to monitor only the strongest, consecutive, or all control channel frequencies in the system. The audio is great and setting up a digital system is fairly easy right out of the box.

Wireless Sensor Tags - Monitor and Find Everything from ...

NMEA 0183 is a proprietary protocol issued by the National Marine Electronics Association for use in boat navigation and control systems. Because early GPS sensors were designed for compatibility with these systems, GPS reporting protocols are often a small subset of NMEA 0183 or mutated from such as subset.
