Oxygen is the chemical element with the symbol O and atomic number 8. It is a member of the chalcogen group on the periodic table, a highly reactive nonmetal, and an oxidizing agent that readily forms oxides with most elements as well as with other compounds. By mass, oxygen is the third-most abundant element in the universe, after hydrogen and helium. At standard temperature and pressure, two ...

CRISPR is the ultimate child star in the biomedical universe. Just six years old, the gene editing prodigy is now the subject of multiple clinical trials that aim to push the lab tech into the real world.. In 2017, a 44-year-old man received the first-ever dose of gene therapy—in the form of zinc-finger nucleases—that targeted a deficient gene in his liver.
