Stop Execution. To stop execution of a MATLAB ® command, press Ctrl+C or Ctrl+Break.. On Apple Macintosh platforms, you also can use Command+. (the Command key and the period key). Ctrl+C does not always stop execution for files that run a long time, or that call built-ins or MEX-files that run a long time. If you experience this problem, include a drawnow, pause, or getframe function in your ...

In last week's report about uitable sorting, I offered a report that I have written which covers uitable customization in detail. Several people have asked for more details about the contents of this report. This is a reasonable request, and so in today's post I will discuss in a bit more detail the highlights of what can be achieved to customize Matlab uitables.
