Task 1.2. What is the fundamental difference between experimental and correlational research? In a word, causality. In experimental research we manipulate a variable (predictor, independent variable) to see what effect it has on another variable (outcome, dependent variable).

Smart Alex Answers - Milton Rocks

While redshift can be used to tell us about the recession velocity of (non relativistic) galaxies, we also need to find a way to measure the distance to these galaxies. Astronomers have two main methods to measure these distances; parallax (more parallax here) and cepheid variable stars - there's a Khan Academy video on cepheid variable stars.
