One type of math problem that many people feel are fun to solve are math patterns. Math patterns take a bit of logic, some observation skills, and some basic math knowledge to figure out. A few of the easier math patterns can probably be solved in your head. If you encounter a more difficult pattern, you may need paper and pencil to figure it out.

Number patterns—such as 3, 6, 9, 12—are familiar to us since they are among the patterns we first learn as young students. As we advance, we experience number patterns again through the huge concept of functions in mathematics. But patterns are much broader. They can be sequential, spatial, temporal, and even linguistic.
