Somatic psychology is a form of Psychotherapy that focuses on somatic experience, and the embodied self, including therapeutic and holistic approaches to body. Body psychotherapy is a general branch of this subject, while somatherapy, eco-somatics and dance therapy, for example, are specific branches of the subject. Somatic psychology is a framework that seeks to bridge the mind-body dichotomy.

Hans Selye [] first popularized the concept of “stress” in the 1950s. Selye theorized that all individuals respond to all types of threatening situations in the same manner, and he called this the General Adaptation Syndrome (GAS). He claimed that, in addition to SNS arousal, other bodily systems such as the adrenal cortex and pituitary gland may be involved in a response to threat.
