My 2000 Saab 9-3, after a great trip to Vermont, now cranks, but won't start. Sounds like it almost wants to, but won't. What's a good first step to try to get it going? It's got 172,000 and I just got it last month. Could it possibly just need new plugs, or a new fuel filter?

I found all the resources with instructions on replacing the battery in the alarm module. I removed mine from my M04 9-5 but am a bit puzzled on how to open this thing. They used screws on earlier models but the newer ones are sealed. I tried scoring the edges with a knife but am not getting anywhere in opening it. Any suggestions besides brute force and breaking things?

The Expendabros have assembled and set their sights on the forces of ruthless arms dealer Conrad Stonebanks in the forests of Eastern Europe. Battle in a flurry of bullets and non-stop action through ten full-throttle missions set amongst the picturesque tree tops and the absurdly dangerous lumber mills teeming with enemy soldiers,...

The Expendabros on Steam

Coach was founded in 1941 as a family-run workshop in a loft on 34th Street in Manhattan, with six leatherworkers who made wallets and billfolds by hand.. In 1946, Miles Cahn and his wife Lillian joined the company. Miles and Lillian Cahn were owners of a leather handbag manufacturing business, and were knowledgeable about leatherworks and business.
