The first moment of area, sometimes misnamed as the first moment of inertia, is based in the mathematical construct moments in metric spaces, stating that the moment of area equals the summation of area times distance to an axis $[\Sigma(a \times d)]$. It is a measure of the distribution of the area of a shape in relation to an axis. First moment of area is commonly used to determine the centroid of an area.

The yield point is the point on a stress-strain curve that indicates the limit of elastic behavior and the beginning of plastic behavior. Yield strength or yield stress is the material property defined as the stress at which a material begins to deform plastically whereas yield point is the point where nonlinear (elastic + plastic) deformation begins. . Prior to the yield point the material ...
