Last week I wrote a post about how to use Katana and Windows Azure AD to secure an MVC4 Web API, and showed how to use AAL to build a Windows Store client in just few lines of code. This week I'd like to show you how you can apply the exact same approach when using the new OAuth2 & JWT support in Windows Server 2012 R2 ADFS; once again, this was one of the most frequent requests after my ...

This is a list of proprietary source-available software, which has available source code, but is not classified as free software or open-source software. In some cases, this type of software is originally sold and released without the source code, and the source code becomes available later. Sometimes, the source code is released under a liberal software license at its end of life as abandonware.
