Start Stop Engine Wear

Even if the extent of your automotive technical knowledge begins and ends with prime time television commercials, you probably understand that the most engine wear takes place when you start your car. Now that we've arrived at a point when most new cars have auto-stop/start technology which ...

Does Auto-Stop/Start Technology Wear Out Engine Components ...

In automobiles, a start-stop system or stop-start system automatically shuts down and restarts the internal combustion engine to reduce the amount of time the engine spends idling, thereby reducing fuel consumption and emissions. This is most advantageous for vehicles which spend significant amounts of time waiting at traffic lights or frequently come to a stop in traffic jams.

Start-stop system - Wikipedia

How does stop-start work? The system uses a computer to detect when the car is stationary or the car is out of gear, at which point it halts fuel delivery and spark to the engine.
