2.1. Binder jetting. In binder jetting technique, the liquid binding agent is spread to a selected area on the powder bed based on the part geometry to form a designed structure layer by layer. A typical binder jetting system has three axes where x and y are responsible for horizontal position, and z-axis refers the depth for x and y.

What is the key to health, wealth and success? Many students want to know. But educators sometimes sidestep or ignore these questions. We don't want to pigeonhole ourselves as self-help gurus. We focus on what we know. We doggedly pursue our teaching mission: Provide students with knowledge and ...

A cigar is a rolled bundle of dried and fermented tobacco leaves made to be smoked. They are produced in a wide variety of sizes and shapes. Since the 20th century, almost all cigars are made up of three distinct components: the filler, the binder leaf which holds the filler together, and a wrapper leaf, which is often the best leaf used.
