Predation is a biological interaction where one organism, the predator, kills and eats another organism, its prey.It is one of a family of common feeding behaviours that includes parasitism and micropredation (which usually do not kill the host) and parasitoidism (which always does, eventually). It is distinct from scavenging on dead prey, though many predators also scavenge; it overlaps with ...

### **Predation - Wikipedia**

Science Fiction (often called sci-fi or SF) is a popular genre of fiction in which the narrative world differs from our own present or historical reality in at least one significant way. This difference may be technological, physical, historical, sociological, philosophical, metaphysical, etc, but not magical (see Fantasy).
