As described in the Sleuth on page 12, if the group assignment changes, we will get different results.

First, the test statistics will be just as likely to be negative as positive.

The Statistical Sleuth in R: Chapter 1 - math.smith.edu

Use of stealth rootkit techniques to hide long-lived malicious processes is a current and alarming security issue. In this paper, we describe, implement, and evaluate a novel VMM-based hidden process detection and identification service called Lycosid that is based on the cross-view validation principle.
