Toad For Oracle User Guide

Hello, I'm trying to write a simple select query USING TOAD for ORACLE that pulls information from a "system_store" table, where I need to find the real date and time stamp for columns "date_time_created" and "date_time_modified", including the "system_name" column. The date range for the query, aka datetime_created, is only for the year of 2008 to group any application from the column "system ...

Hi Ross, So close, yet so far... The thread you reference, Re: no ocijdbc11 in java.library.path is chock full of information, so I really can't offer much new information, but perhaps I can restate it in a better context. 1. If you have no Oracle client installed, you should still be able to connect to databases using the Basic connection type.

How can I use TOAD to transfer data to another identical database. I saw there is a Copy data to another Schema command. I will need first delete all the data in the destination tables, but the tables have foreign key constraints.

How to use TOAD to transfer data from one database to another

History. The first version of SQL Plus was called UFI ("User Friendly Interface"). UFI appeared in Oracle database releases up to Version 4. After Oracle programmers had added new features to UFI, its name became Advanced UFI. The name "Advanced UFI" changed to "SQL Plus" with the release of the version 5 of Oracle.
